SYED USMAN

MACHINE LEARNING & NLP INTERN | PYTHON | APPLIED AI

Bengaluru, Karnataka, India | +91 8299747323 | syedusman8299@gmail.com

PROFESSIONAL PROFILE

Computer Science & Engineering undergraduate with hands-on experience in NLP, machine learning and web development. Built a DistilBERT phishing-language classifier using 40,000 labeled records; won 3rd place at a 2026 national-level hackathon and co-founded a client-facing web development initiative.

TECHNICAL SKILLS

Programming & Web: Python, JavaScript, TypeScript, HTML, CSS, React, Next.js; foundational Java

Applied AI / Machine Learning: DistilBERT, Hugging Face Transformers, scikit-learn, Pandas, NLP, classification, regression, data preprocessing, model evaluation

Engineering & Security: Flask, REST APIs, Firebase, Git, GitHub, Chrome extension development, phishing detection, website security analysis

Data & AI Mathematics (learning): NumPy, Matplotlib, Seaborn, SQL, statistics, probability, linear algebra, calculus

Deep Learning & Generative AI (learning): Supervised, unsupervised and reinforcement learning, PyTorch, feedforward neural networks, CNNs, RNNs, Transformers, LLMs, RAG, GANs, agentic AI

Backend & DevOps (learning): FastAPI, Docker, Kubernetes, containerization

PROJECT EXPERIENCE

Phishing AI Guard — Phishing-Language Detection | Python, DistilBERT, Transformers, Flask

- Built a transformer-based NLP classification pipeline using 40,000 labeled records: 25,000 legitimate and 15,000 phishing examples.
- Created a stratified 80/20 train/test split (32,000 training; 8,000 test) and tokenized text with DistilBertTokenizerFast at a 128-token maximum length.
- Diagnosed and resolved a tokenizer/model-loading mismatch affecting inference; designed complementary domain-age and suspicious form-action checks.

Sales Forecasting — Machine Learning | Python, Pandas, scikit-learn

- Preprocessed historical sales data, explored features and compared Linear Regression with Random Forest Regressor models for forecasting.

PreventX — Preventive Health Platform Concept | React, TypeScript, APIs

- Designed a lifestyle and wearable-data insights concept, including planned long-term risk scenarios and shareable monthly health summaries.
  Project link: https://preventx.vercel.app

ENTREPRENEURIAL EXPERIENCE

Co-Founder — Web Development & Client Delivery | Nexora Technologies | Bengaluru, India | Ongoing

- Helped expand a small business website-development initiative to a fourth-client milestone; gathered requirements and coordinated responsive website projects.
- Supported a website engagement for Hyphensquare Consulting Services, including deployment and domain/hosting coordination, quotations, invoicing and client communication.

AWARDS & COMPETITIONS

- 3rd Place — Nexora National Level Hackathon (2026): Phishing AI Guard, hosted at HKBK College of Engineering.
- Winner — Cyber Heist, HKBK: Solved five progressive challenge stations with a three-member team.

EDUCATION

Bachelor of Technology, Computer Science & Engineering

HKBK College of Engineering, Bengaluru, Karnataka | Currently pursuing

Apna College — Prime 3.0 (AI/ML Program) | Enrolled; curriculum in progress
